LANDSKAP

A RUG COLLECTION
DESIGNED BY CECILIE MANZ

A QUIET INFUSION WITH CHARACTER

THE LANDSKAB COLLECTION is a series of rugs designed by the internationally acclaimed Danish designer Cecilie Manz. This collaboration bridges Kasthall's time-honored craftsmanship with Manz's innovative design sensibility. Renowned for her skillful ability to balance function and form, this collection captures the essence of the Nordic landscape in an unmistakable Manz way.

"From the very beginning, I knew I wanted to include linen in the composition. I think it is one of the most beautiful raw materials, modest yet elegantly refined," says Cecilie Manz.

To fully immerse herself in the craft, Manz bought a small loom for her Copenhagen studio, where she embraced the hands-on process of weaving. "Each new material or technique requires learning about the craftsmanship behind it. That is also the inspiring part for me, getting to learn something new, being allowed to be curious and super nerdy," she explains.

Landskab features four designs – Ålegræs, Spire, Korn, and Gryn – each reflecting a desire to create something of great value and tranquility while upholding the highest standards of quality and expression. With its soothing palette of natural colors and intricate details, the collection is a capsule of serene elegance and minimalist sophistication.

"The colors were chosen to suggest subtle colors, not too strong or loud—tones and hints of colors you'd like to live with over time. They are kept quite dusty; often, you don't need a lot of color to be perceived as 'color.' I like to work with colors in between. Is Salvie green or grey with a hint of green? Is Strå yellow or non-color like the wooden floor? It comes down to the context and what you wish to emphasize," says Manz.

ÅLEGRÆS

Crafted from wool and linen, Ålegræs is a hand-tufted rug in a unique oval shape designed by Cecilie Manz. With three different pile heights, it features a seagrass-like texture with a three-dimensional effect. Inspired by the intricate beauty of nature, this rug's lively surface is framed by a contrasting bouclé border that adds bold definition and elegance.

OVAL SIZES	PRICE JPY	SPECIFICATION
96x120 cm	120 900	MATERIAL: Hand-tufted rug in pure wool and linen.

SPIRE

Spire is a soft, tactile hand-tufted rug made from wool and linen. Its sophisticated 22-degree diagonal pattern, created using a cut and loop pile technique, is a design element that sets it apart. This composition results in a subtle, gentle expression, further enhanced by its two different heights, which contribute to its refined appearance.

KORN

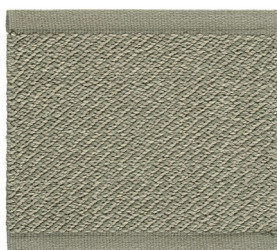

Korn is a rug flatwoven in a broken twill pattern using a unique wavy-effect yarn, with threads of wool and linen running parallel to each other. Developed specially for this collection to achieve a specific texture, this new yarn highlights the natural beauty of linen on the rug's surface, resulting in a lustrous finish that enhances its depth and overall appeal.

SIZES	PRICE JPY	SPECIFICATION

GRYN

Gryn is a thin, light, flatwoven rug that combines wool and linen in a new effect yarn, specially developed for the Landskab collection. This combination of twisted wool and linen creates shimmering pearls on the surface when light shines on the linen yarn. While the rug may appear even from a distance, it reveals a textured surface filled with intricate details up close.
